One head up, one head down, single grip on opposite arm (left-right / right-left), Separate, Each 360 degree turn, return to initial formation

One head-up, one head-down, single grip on same arm (left-left / right-right). Separate, HD performer rotates 360 without changing orientation and HU performer completes a full flip back to head up orientation. Repeat original formation.

Facing each other, one head-up and one head-down with double leg grips on HU performer. Separate, reverse orientation (180 degree vertical transition) and **repeat original formation** in switched positions (HD performer taking leg grips on HU performer).

Both head-up with a single foot dock (left hand on right foot or right hand on left foot). Separate then switch roles. Dock may be made on either side, provided it is left hand on right foot or right hand on left foot.

One head-up, one head-down with single leg grip on HU performer's same leg (right-right or left-left). Separate, HD performer curves around HU performer (passing behind then in front of him/her), then **repeat original formation**.
